

# Step 4- Make a Digital Photo Project

Create a collage. A collage is a collection of images pieced together to create another image. You can use any photos you want. Try to make a collage with a single theme like friendship, or your favorite season, or your animals.

Some of our favorite collage apps are:

PicCollage Video &  
Grid Editor

Photo Collage  
Maker: Pic Grid

Some of our favorite collage websites are:

<https://www.befunky.com>

<https://spark.adobe.com/make/photo-collage-maker/>

# Step 5- Share Your Photos

Now's your chance to show off your photos to your friends and family!

You can save them as an album to show everyone later, or even create your own slideshow to show your family on your computer or project it onto a screen.

# Junior Digital Photographer Badge Review

Think about these questions or talk about them with friends and family.

What was your favorite part of taking photos?

Did anything surprise you when you looked at the photos you took?

Talk to your family about the photos you took, did they like the collage you made and other photos you took?

Do you think you'll continue to take photos for your family and friends?
