

Brownie Jump Into Journeys/Badges

Brownie Activity Choices

Walk your girls through the activity choices and let them decide which ones they would like to do.

Think Like a Programmer Journey

Morse Code Messages

Brownies write their name in Morse Code. This activity introduces programmers as people who create special codes for computers and the concept of different programming languages.

Think Like a Citizen Scientist Journey

Kim's Tray

Brownies practice observation and paying attention to the details as they try to remember a set of items. They will discover that it is helpful to document your observations and to think about what you see.

Think Like an Engineer Journey

Design Challenge: Pop Fly

Brownies work in teams to design and build their Pop Fly prototype using the Design Thinking Process. Their prototypes must launch a Ping-Pong ball across the room and into a box.

Outdoor Journey

Teepee Fire Building

Brownies go outside to collect kindling, tinder, and fuel, then use what they collect to build a “teepee” fire.

Brownie Badge Year

Skittles Game

Brownies get to know each other better by playing a game with Skittles and sharing details about themselves, like their favorite animal or favorite place to visit.

A World of Girls

All Around the World

Girls begin thinking about stories from different parts of the world by looking at a map to find places that were important to Juliette Gordon Low—then sharing where their own families are from.

WOW! Wonders of Water

Wonders of Water Game

Brownies play a simple game that will have everyone acting out the different ways they use water to do fun things. Then they'll share ideas for sharing, protecting, and saving water.

Brownie Quest

Loop the Hoop

Brownies try to move a hula hoop from player to player without letting go of each other's hands. After the game, they talk about teamwork. What makes a good team?
